GILBARCO - TRANSAC SYSTEM - MODEL 12

MANUFACTURER: Gilbarco Canada Limited
1360 California Avenue
Brockville, Ontario

DEVICE APPROVED: Gilbarco Transac 12 electronic cashier's console
and accessories for use in self-serve gasoline dispenser operations
in conjunction with Gilbarco Highline 111B dispensers.

<u>System Component</u>	<u>Model Number</u>
Distribution Box	PA01330000
Control Console	PA01340AX0

System capacity - 12 dispenser hoses.

APPLICATION: For use in self-serve gasoline dispensing systems.

DESCRIPTION: The Transac 12 is the same as Transac 11 (S.WA-1080)
except that the former has several additional features including a
dual memory feature and dual level unit price setting.

By means of the dual memory feature the sale data for two consecutive
deliveries from a dispenser may be retained in memory, thus expediting
operations by enabling a second customer to begin taking delivery
before the previous customer has made payment.

The dual level pricing feature permits the setting of two prices for
each product for day/night sales, cash/credit sales, etc. Provision
is made for presetting both prices so that the desired price level
may be selected by a key-operated selector switch.

Aside from the above, the Transac 12 requires the same operating
procedures on the part of the station cashier as those applying to
the Transac 11, and which are detailed on Notice of Approval No.
S.WA-1080.

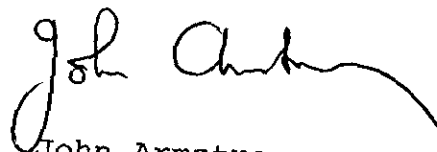

MARKING: On self-serve dispensers there shall be installed, on each
dial face, a permanent legend in letters at least 3/16" high and
reading as follows:

"In case of disagreement between this register and the
cashier's register, this register shall be taken as
correct." or "Charges must agree with this register."

TESTING: The standard tests for self-serve gasoline dispensers shall apply.
