

RECORD OF APPROVAL ACTION

Approval Listing Number -

S.WA-1115

(Issued in advance of preparation of draft Approval Listing only in case of Interim Approval).

Ottawa, November 20, 1978

Company Requesting Approval - Dresser Industries Canada Ltd.
Wayne Pump Division
6686 Kitimat Road
Mississauga, Ontario

Type of Device : Wayne System 70 and System 80 cashier's consoles and accessories for use in postpay self-serve gasoline dispensing systems.

Application: These systems may be used with any approved model of Wayne dispenser with which they are compatible.

Description: Systems 70 and 80 are identical with respect to operation and control features, System 80 being the newer version with certain internal design changes. These systems have the customary complement of controls and indicators applicable to postpay self-serve systems, with a maximum control capability of 9 dispenser hoses. The readout is LED type and indicates the sale money value for any particular dispenser hose when the corresponding selector key is operated. The console receives sale input from a Veeder-Root series 18700 pulser unit that is driven by the money shaft of the dispenser register. Interface between the console and the dispensers is by means of a distribution box that incorporates such facilities as dispenser power relays, emergency stop relays, etc.

Marking: On self-serve dispensers there shall be installed on each dial face a permanent legend, in letters at least 3/16" high, and reading as follows:

"In case of disagreement between this register and the cashier's register, this register shall be taken as correct." or "Charges shall agree with this register."
