RECORD OF APPROVAL ACTION

Approval Listing Number

S.WA-1196

(Issued in advance of preparation of Formal Approval Notice)

OTTAWA, October 29, 1980

Company Requesting Approval: Dresser Industries Canada Ltd.,
6688 Kitemat Road,
Mississauga, Ontario (L5M 2G2)

Type of Device: Dispenser with second outlet on a hose tower for
fuelling trucks.

Model

Description

Suffix -18 is
added to the
model number to
indicate this
feature

This feature can be used with any approved model
of Wayne dispenser. The modification to the
dispenser consists of splitting the stream from
the meter ahead of the dispenser hose and instal-
ling piping to connect the second branch to a
model 18 hose tower. To permit use of only the
hose at the dispenser or the hose at the tower,
but not both simultaneously, there are solenoid
valves installed and interlocked so both cannot
be opened at the same time.

Special Conditions: Dispensers and hose towers shall bear plaques with
the legend "Minimum Delivery 200 Litres" in letters at least 4 mm
high. Hoses shall be not longer than 4.6 metres or 15 feet.
