Mr. Ron Kirk, Production Manager
Petroquip Limited
33 Mallard Road
Don Mills, Ontario
M3B 1S4

1990-04-18

Dear Mr. Kirk,

This is in response to your recent notification given in accordance with the Weights and Measures Regulations, Section 14, regarding devices approved under Notice of Approval S.WA-2124. It is noted that these devices are to be modified as follows:

- For rebuilt blending type gasoline dispensers using the Wayne Blend-O-Matic components, the actual blending of the product can take place in two locations:
 1. at the nozzle, using two hoses with a 'T' at the nozzle, or
 2. where the hose is piped to the cabinet, replacing the two hoses with a 'T' casting at the cabinet outlet and only one hose to the nozzle.

I am advised by the Volume Metrology Laboratory that their evaluation of the proposed modifications indicates that they may be regarded as immaterial in relation to the approval provisions of the Act. Accordingly, your notification is acknowledged and the modifications are accepted as being included within the above-noted approval. All recipients of the approval notice are being informed by copy of this letter.

Yours truly,

W.R. Virtue, Chief
Legal Metrology Laboratories
